

Avalon University

School Of Medicine

MEMORANDUM OF UNDERSTANDING

This memorandum of understanding is hereby made and entered into by Avalon University School of Medicine and Sumandeep Vidyapeeth, Piparia, Vadodara.

Avalon University School of Medicine, Curacao, is a government recognized Medical school in Curacao. Pre-medical science and Basic Medical Science programs are conducted at the Curacao campus and the subsequent clinical science program is conducted in ACGME approved Hospitals throughout the United States. Over 125 students are studying at the campus located in Curacao and approximately 315 students are studying in US Hospitals.

US Clinical Experience is important for students who are looking to practice in the USA and/or Canada. Many program directors of US residency programs require that international students looking to enter US residency programs have a minimum of US Clinical experience. This is where Avalon University School of Medicine, Curacao serves to assist students interested in gaining US clinical experience, either to work toward medical licensure in the United States, or for those students who are looking to expand their clinical experience with the intention of returning to practice medicine in their home country.

The purpose of this MOU shall serve as formal documentation in regards to our conversations regarding the affiliation, exchanging of resources and program development between the two parties. The MOU is valid once all parties agree and sign the document, and will be set as agreement.
